The X-files Empire 1313: Keys to secret ciphers. The Turkic names of numbers from 1 to 10, as well as 20, 30, 40, and 50, are a prophecy.

Dual-language book / М. Илле — «Автор», 2026

Here, in this work, — are two sets of secret keys. It is required unusual thinking, to understand, that here is hidden a treasure. For understanding of the complexity of this work is insufficient one only high IQ. People even with ready keys and with IQ 120–130 do not see regularities and hidden data. Here is required an unusual set of programs in the head, to see that which is created by the architect. For me a mystery, how they did it, — probably, these were people of the level of mathematicians solving tasks of the millennium. I recommend to read Tanakh and other ancient texts and to compare with keys presented in this work, — this is very informative. Proof of the correctness of keys — this is numbers from Bereshit 199-89-280-999 through divisor 7. Read other mini-books, and everything you will understand, or find yourself — this is easy, when everything they showed and told.

The X-files

Inside are secret materials from the distant past and keys to the mysteries of ancient texts. This mini-book will reveal our world to you from a completely new perspective. Within its pages, I have left two sets of keys, each consisting of 22 numbers. They unlock the ability to see hidden layers of mathematics and physics within ancient writings. With these keys, you will be able to verify everything yourself and see that this is no mere fantasy.

There, you will discover Mars, nuclear fusion, the birth time of the Universe and the Sun, as well as the moments when life perished on Earth and Mars. You will see that my decodings of Turkic number names are well-founded, and that the Shulgan-Tash cave is actually the ark from the Epic of Gilgamesh. Furthermore, you will find proof that over 4,500 years ago, work was being done to study the laws of the Universe at the 16th parallel south latitude in Peru, South America. The numbers of the Quechua and Ancient Egypt prove their Tatar (Turkic) origin.

In addition, the texts contain references to a "fiery chariot." I interpret this as a spaceship that ancient people witnessed in the future as a means to fly to Mars. An incredible number of encoded coincidences are hidden within these books—phenomena that cannot be dismissed as mere random patterns. For instance, a rocket needs a speed of 11.2 km/s to overcome Earth's gravity and escape it, while the number of Earth is 11. The numerical value of the name Laban is 82, and the speed of light is 186,282 miles per second.

Let us add more facts about Laban: he had two daughters, and Jacob worked for them for a total of 20 years ($7 + 7 + 6$). The number 20 symbolizes a bowl. The bowl itself represents the Sun, pouring life upon us in the form of photons. Moreover, the very name Laban means "white, pure," which directly corresponds to light.

In this work, there will be no fantasy, but a real decoding through the Unified Cipher of the Empire 1313.

These are very ancient knowledges, of the times when there still were Sumerians and yes Sumerians are definitely a Turkic people.

Sumerians were conquered finally approximately in the year 2000 BC.

After which, the territory of Sumer became bilingual in science, what became of the population the main mass is unknown to me.

There remains the question from where are these ancient knowledges of Astronomy, Mathematics, Physics at the level of the 20th-21st century.

One can assume such variants of the development of events:

- 1 - Sumerians were monopolists of sciences
 - 2 - Sumerians + Semites were monopolists of sciences
 - 3 - Sumerians gave their knowledges to speakers of the Semitic language after their conquest
- Karaims are speakers of 2 languages Turkic and Semitic for thousands of years.

Plus by me in ancient texts are discovered Turkic words, which are used by me including for the decoding of Turkic numbers.

For today by me with the help of the Unified Cipher of the Empire 1313 are obtained data such: found is the Ark from the Epic of Gilgamesh - this is Bashkiria cave Shulgan-Tash 53 N.L. about this read in another mini book, Discovered is a message encoded in the Great Pyramid of Giza - also in one of the mini-books, Bereshit chapter 22 - is dedicated also to that, that people will live on Mars. Found are coordinates 16 S.L. the place of extraction of Astronomical data this is South America Peru. Numbers of Ancient Egypt and numbers of Quechua - this is the Tatar counting, but more ancient than the one which modern Turks use.

Also discovered is that Sumerian syllables, this is at least partially a rebus principle of encryption of phrases, therefore syllables have some identical Pictograms and several names, the names themselves are decoded through the image of the Pictogram.

We see that these numbers are contemporaries of Sumer, and there I at the Sumerians found the number 5 bish and the number 3 och - as I wrote above they for some reasons incomprehensible to me, used not the usual Abbreviated method, when from a word they take 1 letter, but they took the last letter from a word and so created syllables - these numbers I easily found, through acquaintance with the Pictogram hand - SHU - and obtained 5+3. Five fingers you squeeze into a fist and they are inside, the fist itself this is a means of defense, protection, your fortress.

As we see 53 - this is a very strong sacred number.

And a multitude of other data which prove that which and so by fact is obvious, that Sumerians this is a Turkic people.

What from such a volume of data to call a stronger discovery it is difficult to answer, because everything is simply at the level of fantasy.

Bonus:

Ancient Egyptian Alphabet interpretation through the Tatar language through unique features

(Vulture - Neophron percnopterus) — is read as Russian A - bird symbol of father mother - Ata - Ana

(Reed) — is designated as j (is read as I or Y) - Ine - needle (characteristic of the reed - they used it as a pen for writing, it has small needles)

(Two bushes of reed) — is designated as y (long I or Y)

(Hand) — is designated as ċ (deep throat sound, conditionally is read as A - the letter Ayin this is a specific sound Gabdulla - Abdulla) Galemner Iyase — "Lord (Master) of Worlds" officially Galem Arabic origin, it is required to take into account, that this is only a hypothesis, like other hypotheses for other words, which also officially up to 40 percent of all words in Tatar this is Arabic or Persian origin.

(Owl) — is designated as m (sound M) symbol of extraordinary flexibility of the neck, this is taken into account in the hieroglyph - Muen - neck

(Wave of water) — is designated as n (sound N) - NEKYSH as "NEK SHU" - exactly such - (14th letter of the Hebrew writing through Tatar names of letters), this word here is the most suitable and exact, this letter has a very deep scientific physical mathematical basis, in gematria classic to the letter N is assigned the number 50, the Sun total by their ancient calculations of Sumeria - Empire 1313 the Sun will produce autonomous entities 50 circles * 216 million years, after which thermonuclear fusion will stop, that is there will be no more wave of photons from thermonuclear fusion.

(Mouth) — is designated as r (sound R) - Retleu - feature of the mouth orderly to speak, in contrast to animals.

— Ĥ (Deep, strong Kh with a dot) - Khaty (Katy) - multilayered, hard, durable.

ĥ (Soft Kh with a line below) - Longitudinal outline of the belly of a mammal with teats and a tail (although visually the sign looks like an elongated mechanical unit or a bolt-latch). - bash. Hyiyr - Syer - cow, Hyy - Syy — treat.

(Sieve / Placenta) — is designated as ħ (hard Russian Kh, like in the word khleb)

bash. Hynggylyk - Songgylyk - placenta

«ħ» (kha), combining in itself at once two sounds: a hard hissing Kh and a guttural vowel-aleph - Khezine - treasure hidden - pictogram Water lily its unique feature, after pollination it hides the fruit under the silt, seeds the most valuable in the water lily this is its treasure its treasure.

(Leg) — is designated as b (sound B) - Bas - stand up, step on

(Mat) — is designated as p (sound P) Perevez - spiderweb (unique feature they made from reed long baskets and into this basket they inserted a narrowed from reed neck, fish swam in, but to exit could not, the trap worked like a spiderweb. Manufacture is similar to a spiderweb cross stripes)

(Horned viper) — is designated as f (sound F) Pychrak - wet mud like after rain (horned viper I interpret as a slug - its feature comes out into the mud during high moisture of the soil)

(Bolt for a door) — is designated as s (sound S) - Saklyi - protects

(Garden pond) — is designated as š (sound Sh) - Shishme - spring

(Sandy hill) — is designated as q (deep, hard K) - Kom - sand

(Basket with a handle) — is designated as k (regular K) Kese - pocket, Kese — bowl, cup

(Stand for jugs) — is designated as g (sound G)

(Loaf of bread) — is designated as t (sound T) - Talkan (Talgan) — Ancient "bread" of nomads

(Tethers for cattle) — is designated as ṭ (soft sound Th or Ch) - Tyshau - tethers

(Hand palm) — is designated as d (sound D) - Dus means friend, which is a friendly handshake

(Cobra) — is designated as ḍ (sound Dzh or soft Dh) - Yelan - Zhylan - snake
